Inspection conducted by Dawn Wall.

CATEGORY I: Compliant item(s) identified this inspection:

Item No: 10 General Requirements for Structure and Construction

2 CSR 30-9.030 (1) (A) 1. Housing facilities for dogs and cats must protect the animals from injury, contain the animals securely and restrict other animals from entering.

There are at least three outdoor pens that have large holes where the dogs have dug. Some of the holes are large enough that could cause injury to the dogs. The licensee needs to fill the holes so the dogs do not injure themselves.

6/21/11 The pens that had large holes have since been filled.

Corrected on: 6/21/2011

CATEGORY III: Non-compliant item(s) identified this inspection:

Item No: 10 General Requirements for Structure and Construction

2 CSR 30-9.030 (1) (A) 1. Housing facilities for dogs and cats must protect the animals from injury, contain the animals securely and restrict other animals from entering.

There is one outdoor enclosure that has two large holes approximately 12" in diameter and 5 " deep.

These holes pose a risk of injury to the dogs. The licensee needs to fill the holes to prevent a risk of injury.

To be corrected on: 7/21/2011

Item No: 12 General Requirements for Surfaces and Cleaning

2 CSR 30-9.030 (1) (A) 3. C. All other (non-floor) surfaces of housing facilities must be cleaned and sanitized when necessary to satisfy generally accepted husbandry standards and practices.

The whelping building contains an accumulation of hair, dirt and grime on the pens and pvc pipe that run along the enclosures. In addition, there were two enclosures in the building that contained food and water but there were no dogs occupying the pens. The licensee shall provide a deep cleaning to the whelping building removing the dirt, hair and grime. In addition, when dogs are removed from the enclosures the licensee shall clean the pen.

To be corrected on: 7/4/2011

INSPECTION REPORT

Reinspection Inspection

Item No: 12 General Requirements for Surfaces and Cleaning

2 CSR 30-9.030 (1) (A) 3. B. Maintenance and replacement of surfaces. All surfaces must be maintained on a regular basis. Surfaces of housing facilities, including houses, dens and other furniture-type fixtures and objects within the facility, that cannot be readily cleaned and sanitized, must be replaced when worn or soiled.

Some of the whelping pans are chewed and cracked and can no longer be properly cleaned and sanitized. The licensee shall replace the chewed and cracked pans to satisfy animal husbandry standards.

To be corrected on: 7/4/2011

Item No: 25 Outdoor Facilities; Construction

2 CSR 30-9.030 (1) (D) 3. Building surfaces in contact with animals in outdoor housing facilities must be impervious to moisture.

There are several outdoor hutches where the paint is wearing off and portions of the hutches are no longer impervious to moisture. The licensee shall paint and/or seal all the outdoor hutches so they will be impervious to moisture and increase their longevity.

To be corrected on: 7/21/2011

Item No: 48 Veterinary Care

2 CSR 30-9.020 (8) Attending veterinarian and adequate veterinary care.

There is a female American Bulldog (no identification) that had hair loss on the top of her head. The licensee has been self medicating the dog with "Blue Lotion" for a day but during the inspection it was noted that there were several flies on top of the area. The licensee shall consult with their attending veterinarian for appropriate treatment and a record should be maintained and presented at the next inspection.

To be corrected on: 6/28/2011

Item No: 48 Veterinary Care

2 CSR 30-9.020 (8) Attending veterinarian and adequate veterinary care.

There is a male American Bulldog (no identification) that had hair loss on the top of his right ear. The licensee shall consult with their attending veterinarian for appropriate treatment and a record should be maintained and presented at the next inspection.

Inspection conducted by Dawn Wall.

CATEGORY I: Compliant item(s) identified this inspection:

Item No: 12 General Requirements for Surfaces and Cleaning

2 CSR 30-9.030 (1) (A) 3. C. All other (non-floor) surfaces of housing facilities must be cleaned and sanitized when necessary to satisfy generally accepted husbandry standards and practices.

At this inspection, there are a few cobwebs in both buildings. There is dust and grime starting to build up on the plastic pipe in the buildings. Need to clean the non-floor surfaces and sanitize when necessary to meet the regulation standards for the health and well-being of the dogs. This needs to be done in both buildings (new building and the whelping building).

5/12/11 The whelping and sheltered building have been cleaned and no build-up of dust, grime or cobwebs noted during this inspection.

Corrected on: 5/12/2011
